Thanks, Kelly.

As discussed earlier today, and agreed upon by all parties, the 8 Hour NIOSH 6009 air sampling must be conducted while the HVAC systems are shut off and room temperatures are maintained around 70 degrees f. EPA also agrees that it is best to use fans to mix air from near the floors with the air in the rest of the room to get a representative sample.

If there is any change to tomorrow's sampling activities, please notify me immediately. We will plan to oversee the sampling beginning at 8 am.

Thank you for all the hard work that you and your team have put in so far!

Mike,

As per our conversation, here is the draft of our re-entry plan. Thanks again for giving us your input, we really appreciate it!

Regards,

Kelly C. Scribner, Ph.D.
